

# Evgeniy Samuta

## Frontend developer

Entry-level frontend developer with 0.5 years of experience in maintaining and building web pages. Seeking for new opportunities and challenges that will improve and expand my skill set.

### WORK EXPERIENCE

#### Frontend developer

Apr 2022 – Present

Jooby.dev (part-time)

Achievements:

- Developed an adaptive sections for website
- Implemented a website form for accepting job applications
- Realized internalization globally and translated a vacancy form with i18next

Stack: JS, HTML5, CSS3 (+CSS Flexbox), Bootstrap, Vue.js, i18next, Node.js, Git, GitLab, Ruby on Rails, PostgreSQL

#### Freelancer

Nov 2021 – Present

During my training in programming at Hexlet, I have managed to learn the basics of modern layout and positioning for adaptability and accessibility web pages, programming fundamentals, algorithms and data structures, professional JavaScript, browser application development using native DOM API and libraries like React, Redux, Redux-Toolkit, Bootstrap, and also the essentials of architecture, infrastructure and automated tests. I have reviewed other people's code, sorted out their stack trace and discovered issues helping people to cope with practical tasks and to write better code.

Achievements:

- Completed 32 courses connected with frontend technologies and computer science
- Solved more than 220 practical tasks
- Finished 27 extra challenges
- Developed 3 projects from scratch
- Fought in 39 battles at the CodeBattle (29W / 10L)

#### Administrator

Sep 2021 – Present

Jooby.dev (part-time)

Achievements:

- Formed and posted more than 500 vacancies
- Made published texts more likeable, which led to growth in the number of views and subscribers by 10%
- Contributed to the creation and editing of Jooby's quarterly analytics (2021 Q4, 2022 Q1)
- Received more than 15 positive feedbacks with gratitudes from customers

### CONTACT

### SKILLS

*Languages:*

- JavaScript (ES6+), HTML, CSS, TypeScript (in progress)

*Tools, frameworks and key libraries:*

- React (React Hooks), Redux, Redux Toolkit, Node.js, Bootstrap, React-Bootstrap, Ant Design, React-Router, commander.js, Jest, i18next, Webpack, Git, Postman

*Architecture:*

- MVC, CQS, OOP, SOLID

*Techniques:*

- Automatic programming, functional programming, fluent interface, CSS-IN-JS, regExp

*CI/CD:*

- Github Actions, Gitlab, Vercel, Railway App

*Libraries:*

- Lodash, on-change, axios, yup, Formik, SASS

*Code quality control:*

- CodeClimate, ESLint

### EDUCATION

#### Belarusian State University of Transport

Bachelor of Applied Science

Organization of transportation and management of road and urban transport (International road transportation)

Engineer-manager

Gomel, Belarus, Sep 2014 – Jul 2018

#### Hexlet

Frontend developer

Main programming course "Frontend development"

Remote, Sep 2021 – Present

## PROJECTS

---

### ❖ [Admin panel](#) (in progress)

Web-admin panel for managing IT PM community in Telegram. One of the features will be ChatGPT.

### ❖ [Chat](#) (in progress)

A messenger with a simple interface for working communication between employees within teams.

### ❖ [RSS aggregator](#)

A web application that aggregates RSS feeds for easy reading of a variety of information sources. It allows you to add an unlimited number of RSS feeds, update them and add new feeds to the aggregator

<https://rss-aggregator-green.vercel.app/>

### ❖ [Difference generator](#)

A program which determines differences between two data structures, generates a report and format output in different ways (CLI)

### ❖ [Brain Games](#)

A set of five console math games (CLI)

## LANGUAGES

---

English

Intermediate (B1)

Polish

Beginner (A1)

Russian, Belarusian

Native

## OTHER

---

- Have got 6 kyu at Codewars
- Took part in school local and region contests on maths, physics, computer science, english; ranked the top
